## Overview: Global AQI Analysis

Introduction:

### 1. Global Air Quality Overview:

- A concise exploration unveils worldwide air quality statuses and AQI values, capturing the essence of daily variations.

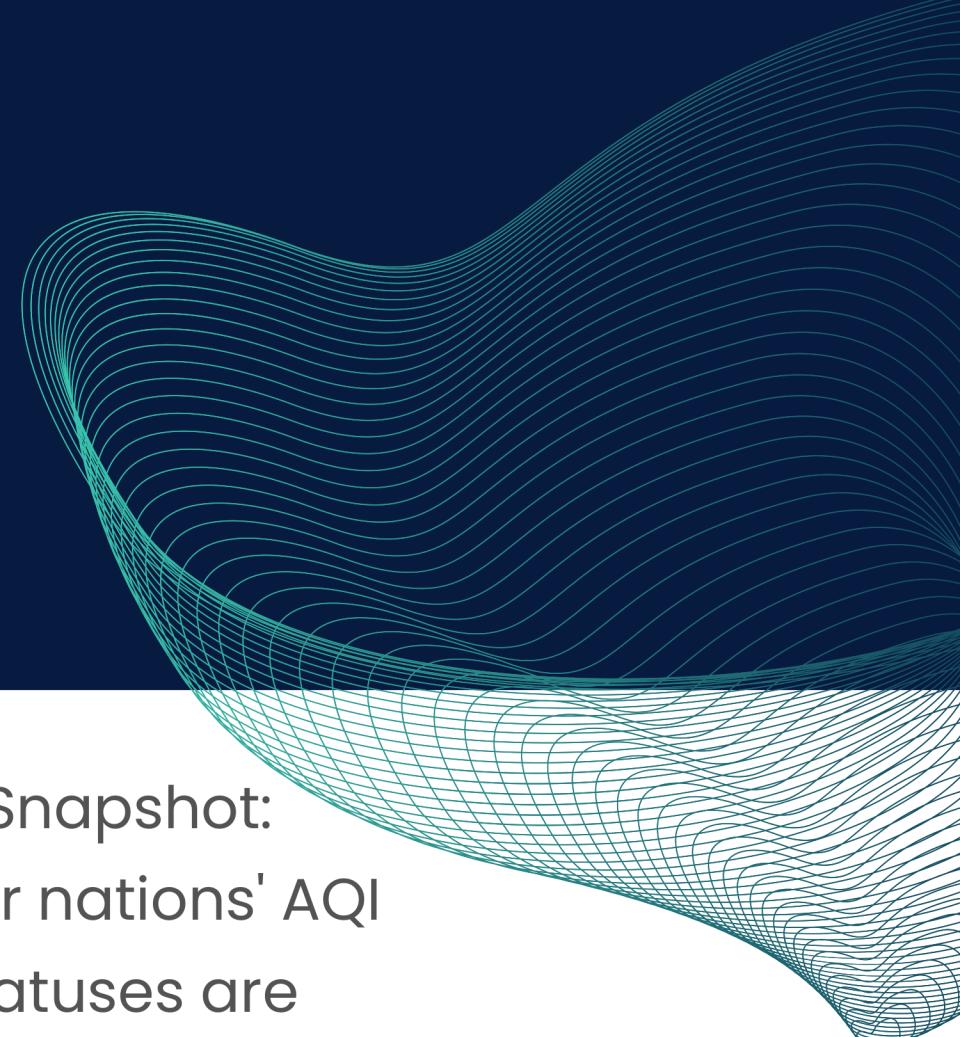

### 2. Top AQI Performers:

- Identifying countries with the highest AQI values on the day before, this insight spotlight unveils regions facing immediate air quality challenges.

### 3. Lowest AQI Rankings:

- Turning our focus to the lowest AQI values, we recognize nations demonstrating commendable air quality practices and environmental resilience.

- Major Countries Air Quality Snapshot:
  - In a brief overview, major nations' AQI values and air quality statuses are highlighted, encapsulating challenges in densely populated or industrialized regions.
- Global Air Quality Status:
  - Categorize air quality based on AQI values, offering a snapshot of the current global scenario.
- Top and Bottom Performers:
  - Identify the top 10 countries with the highest and lowest AQI values, highlighting regions of concern and better air quality.

# Question:

some public problems related to the global Air Quality analysis

**What is the air quality status and AQI values of countries worldwide ?**

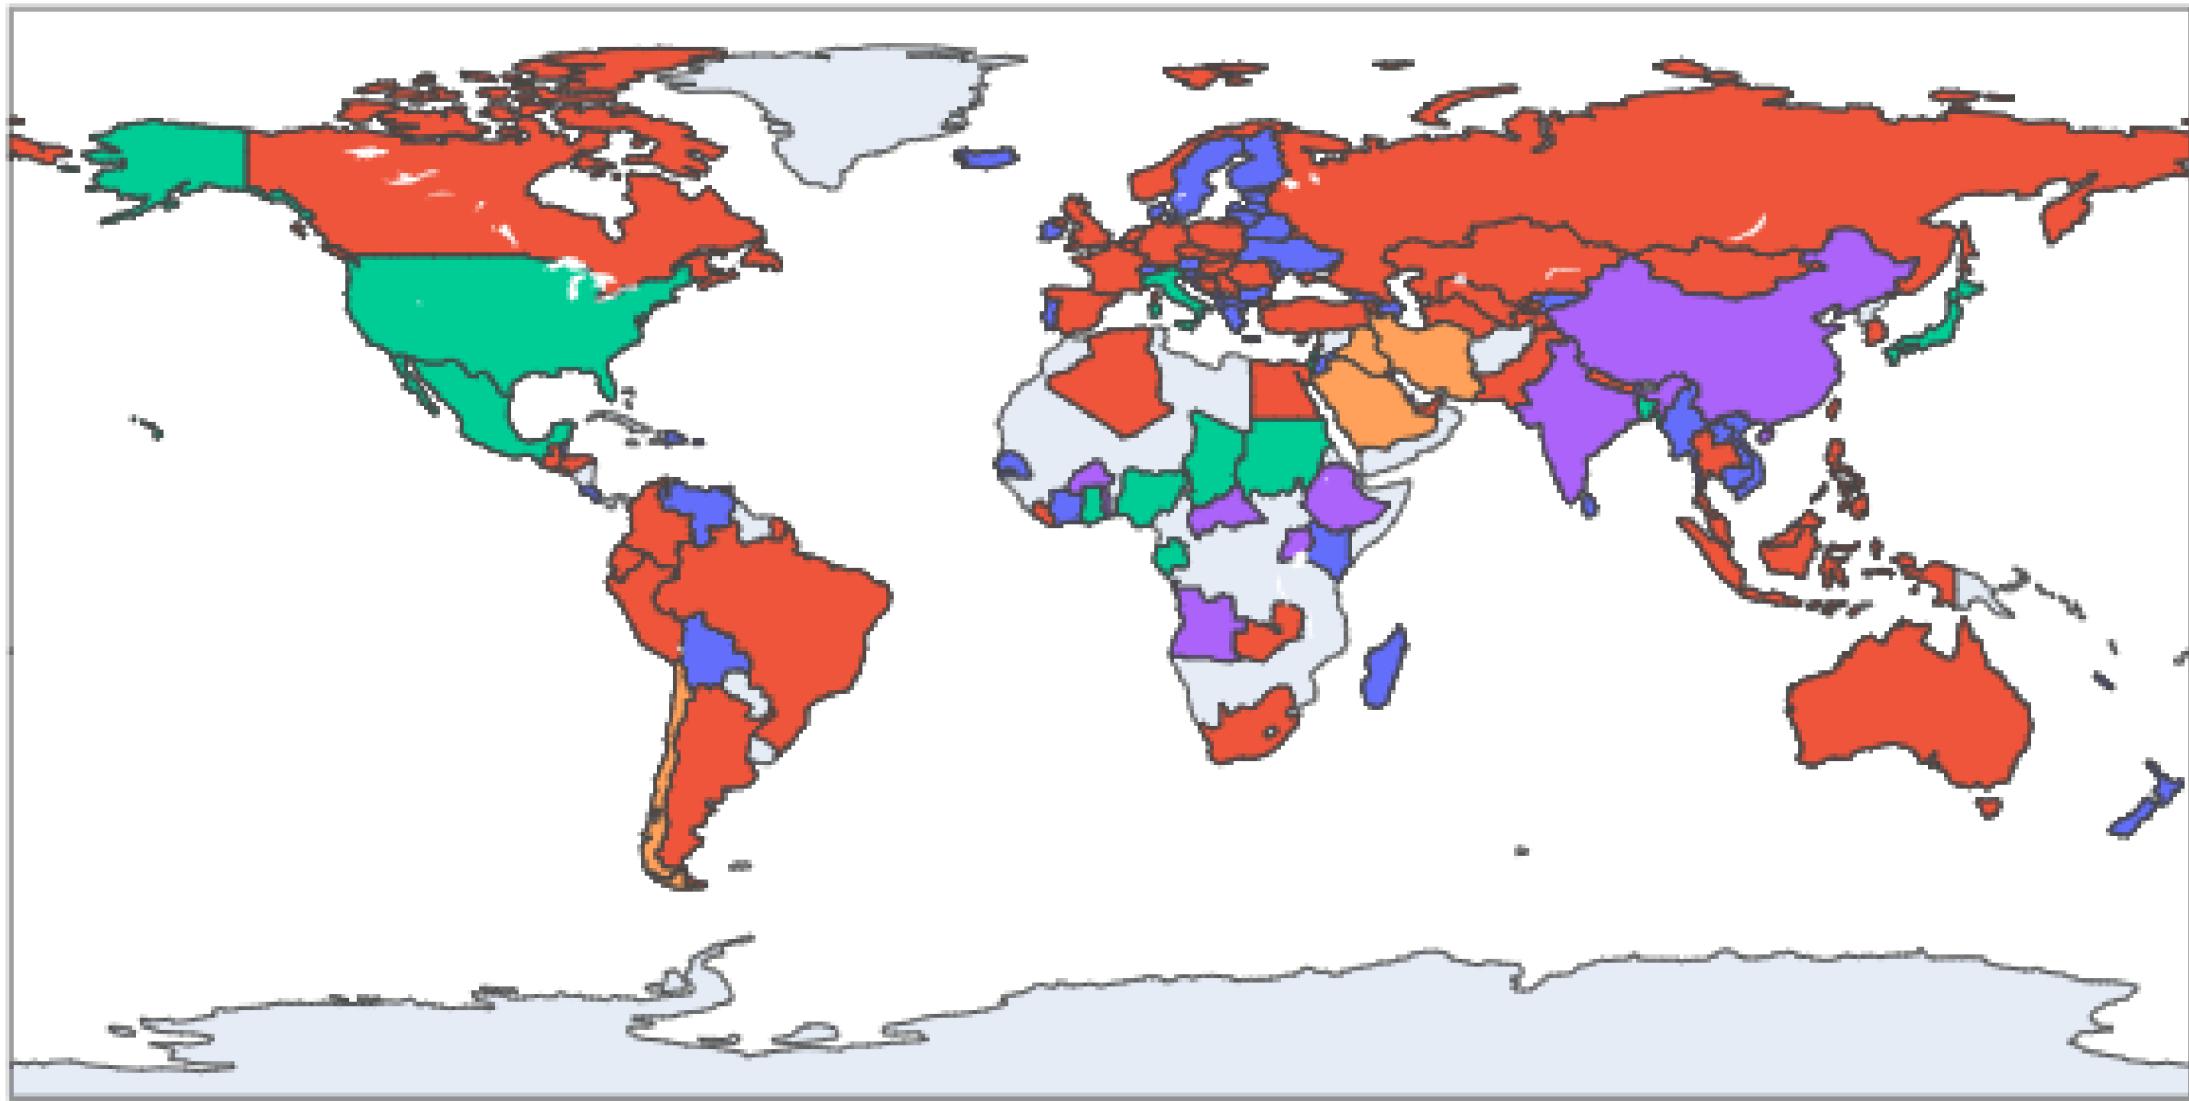

**Which countries had the highest AQI values ?**

**What are the AQI values and air quality statuses for major countries?**

**Which countries had the lowest AQI values ?**

# Air Quality

What is the air quality status and AQI values of countries worldwide ?

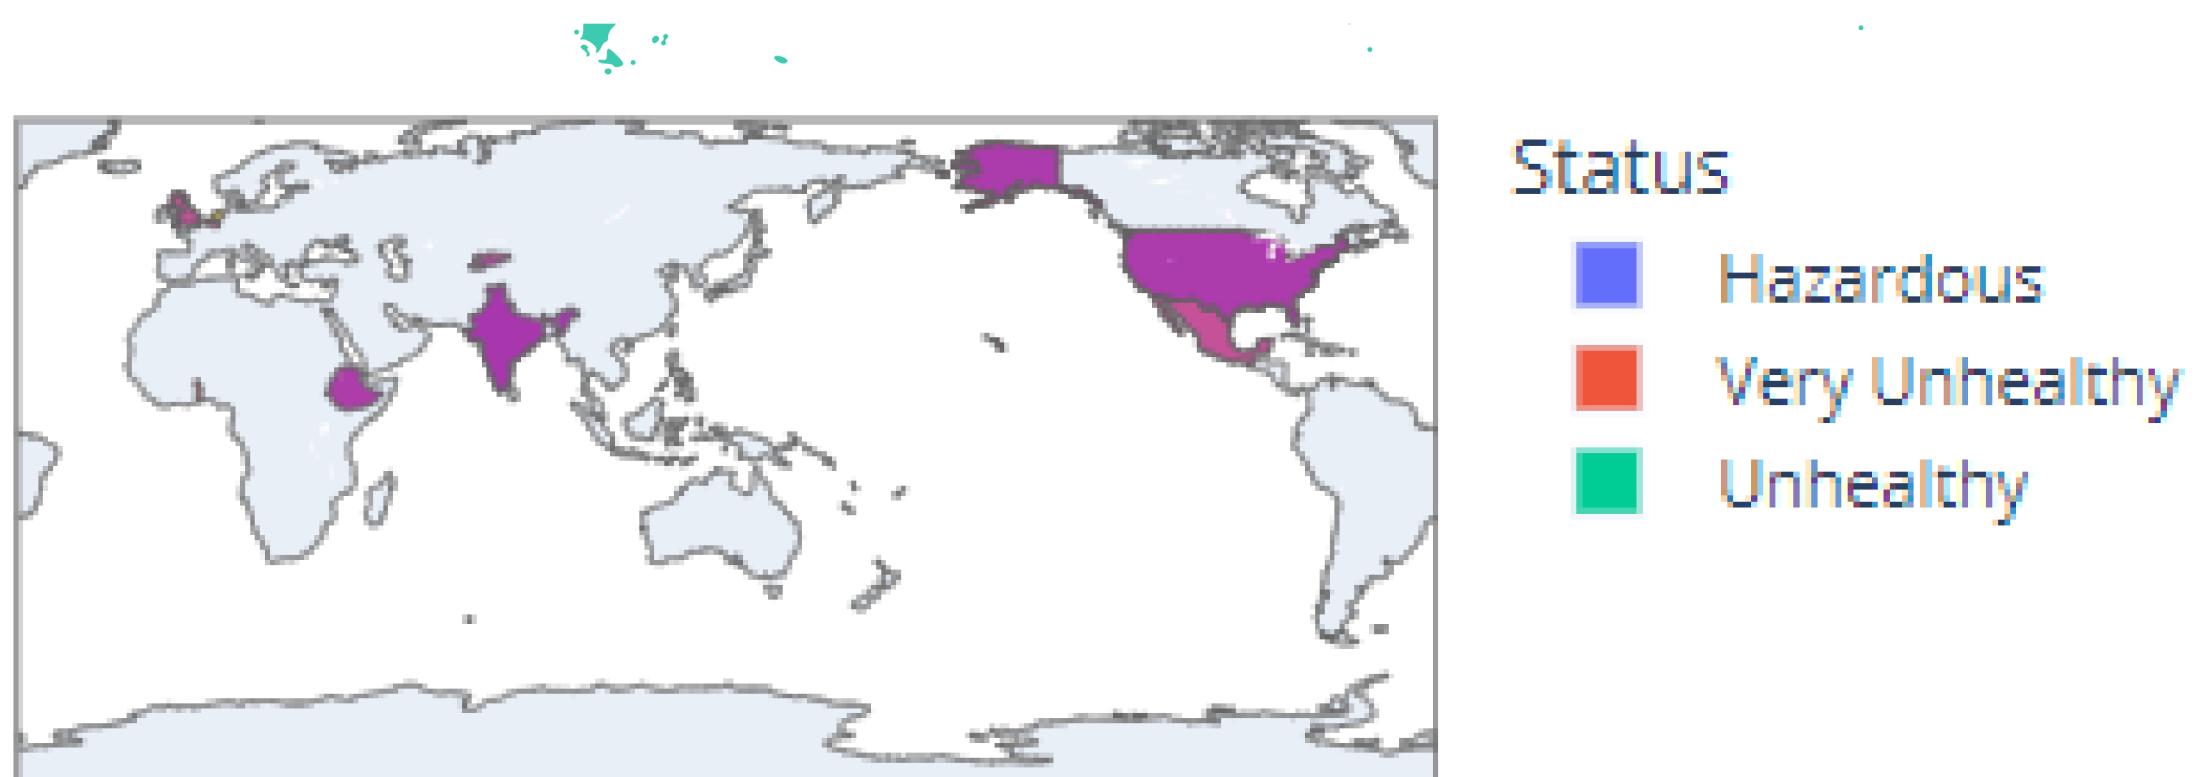

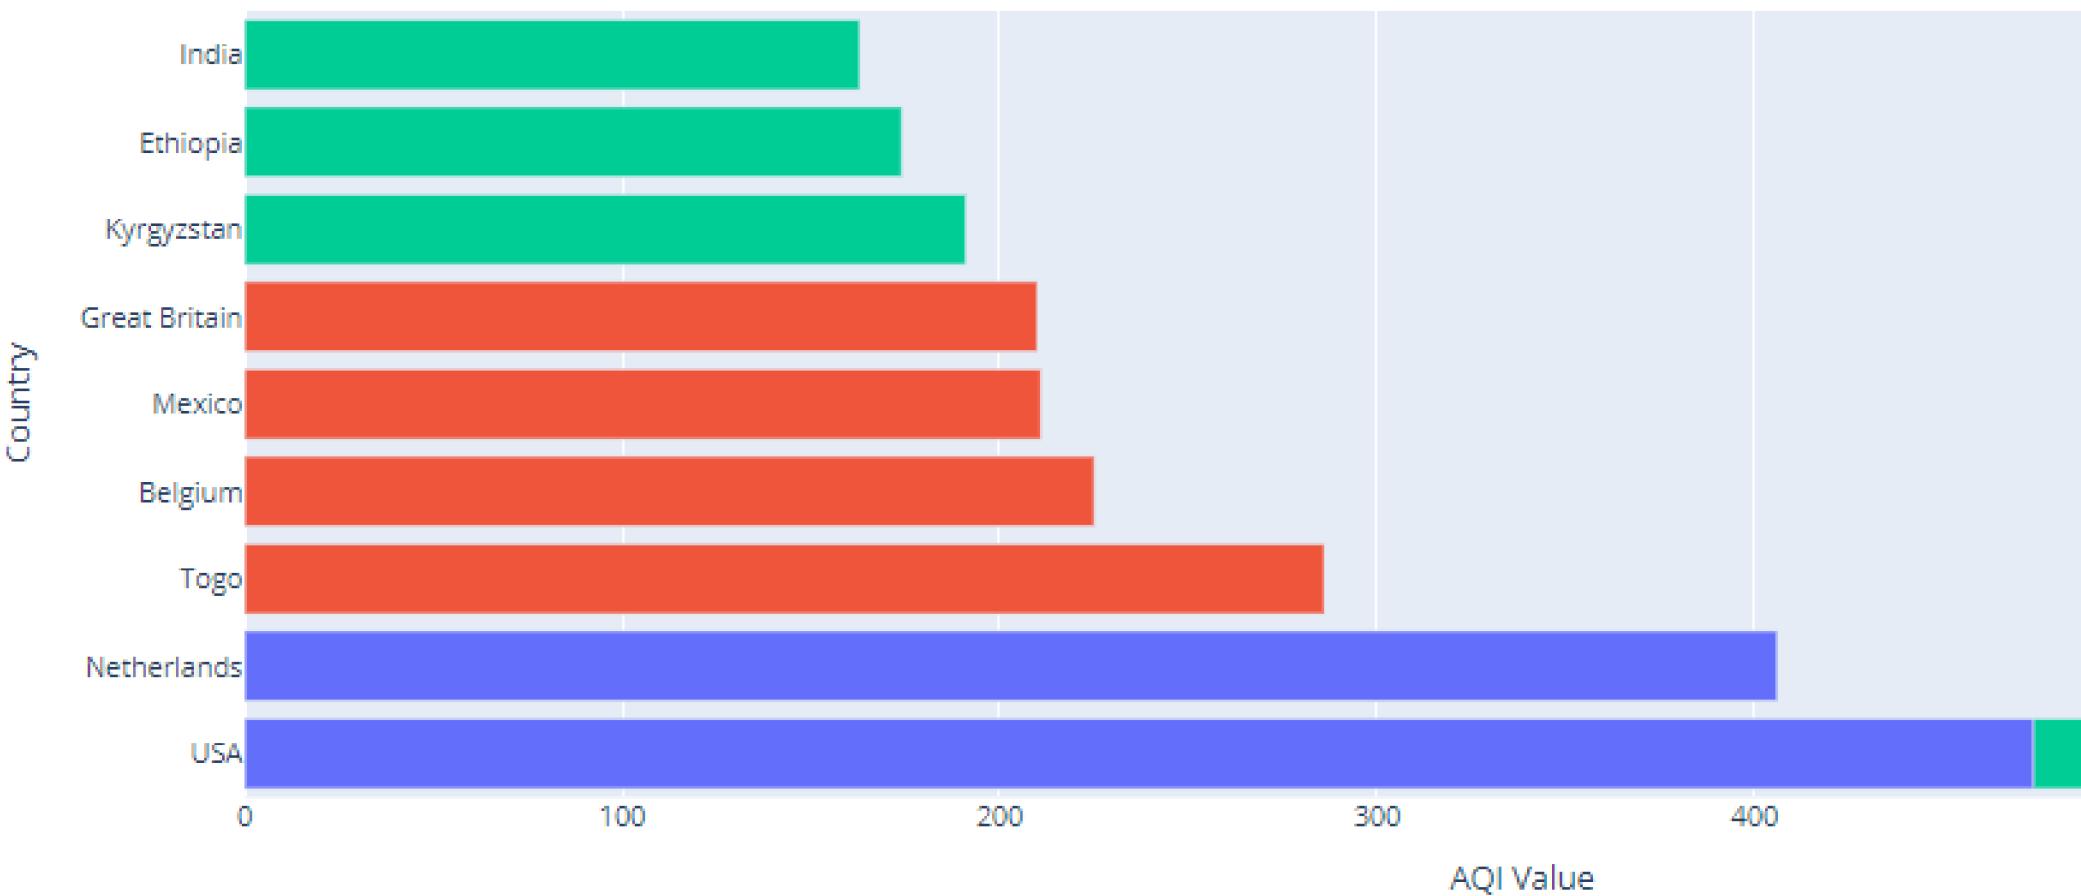

Status
Good
Moderate
Unhealthy for Sensitive Groups
Unhealthy
Very Unhealthy

# Air Quality

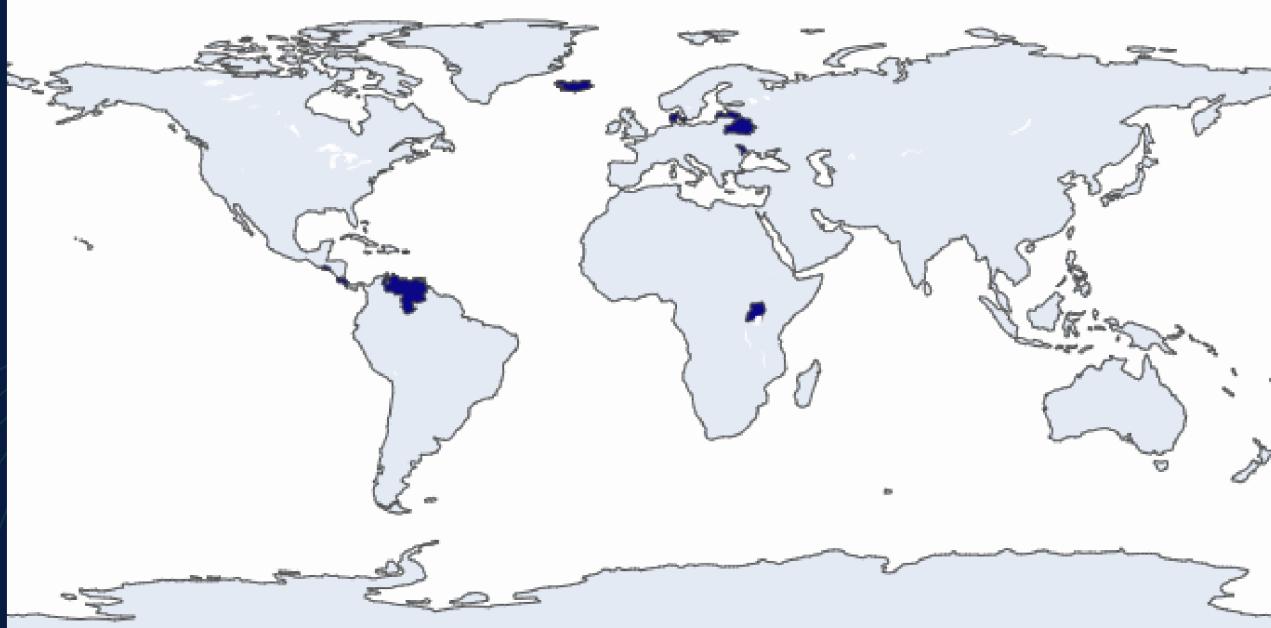

Which countries had the highest AQI values on the day before the analysis ?

Top 10 countries with highest AQI value of yesterday.

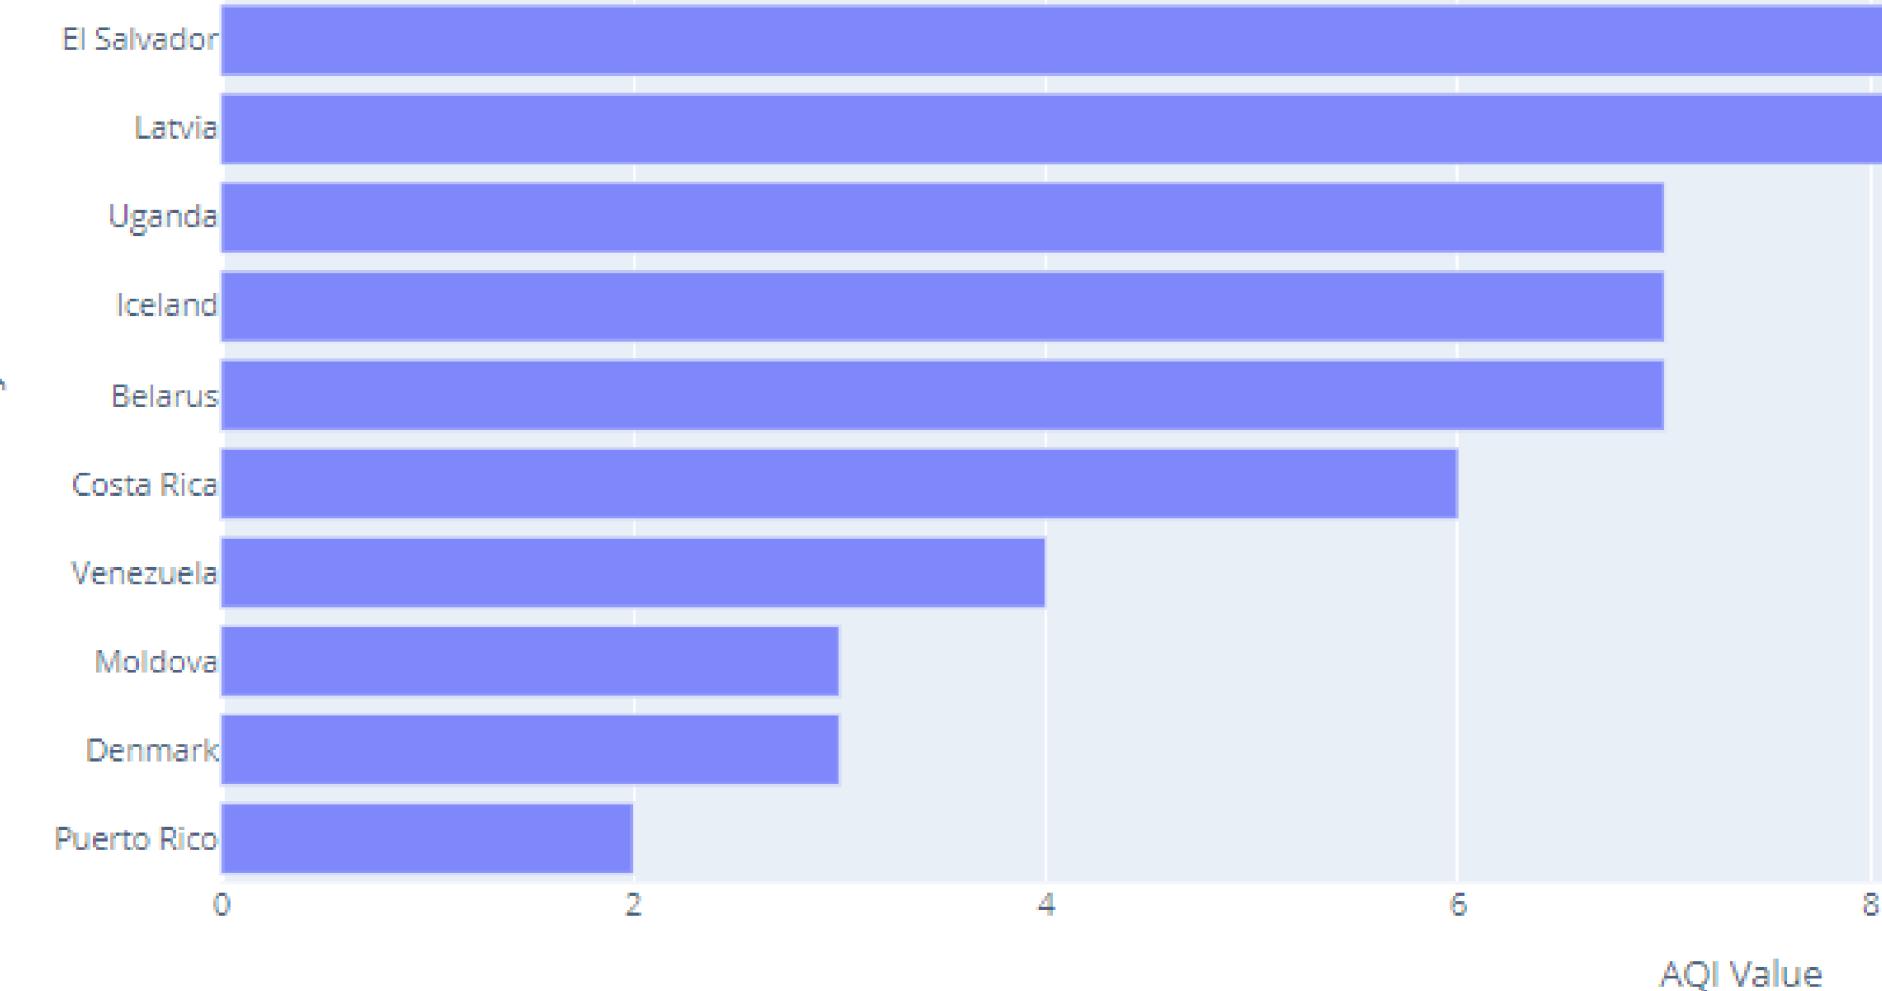

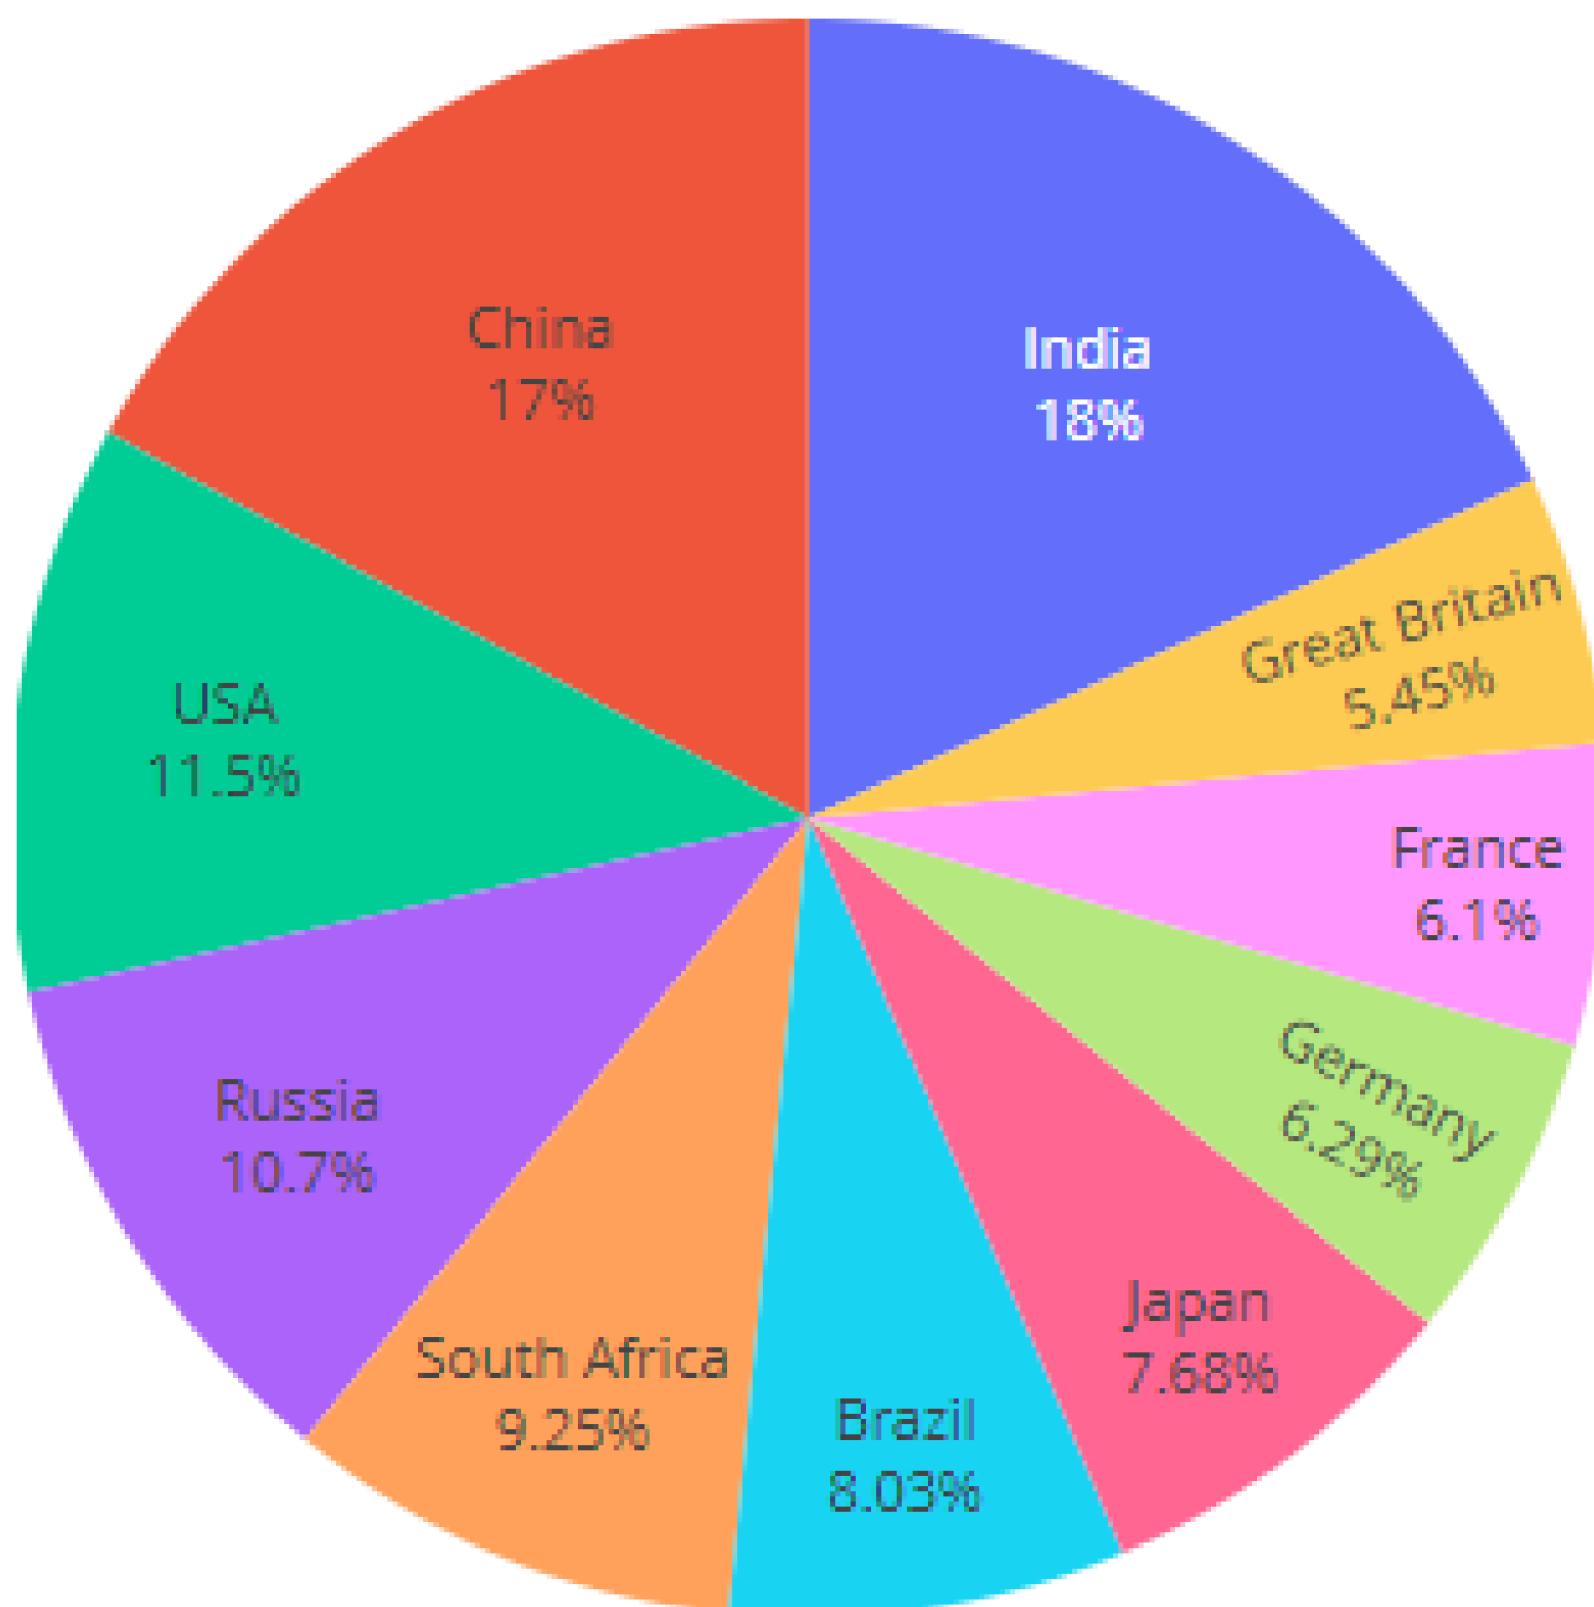

# AQI

Which countries had the lowest AQI values on the day before the analysis?

Top 10 countries with lowest AQI value of yesterday.

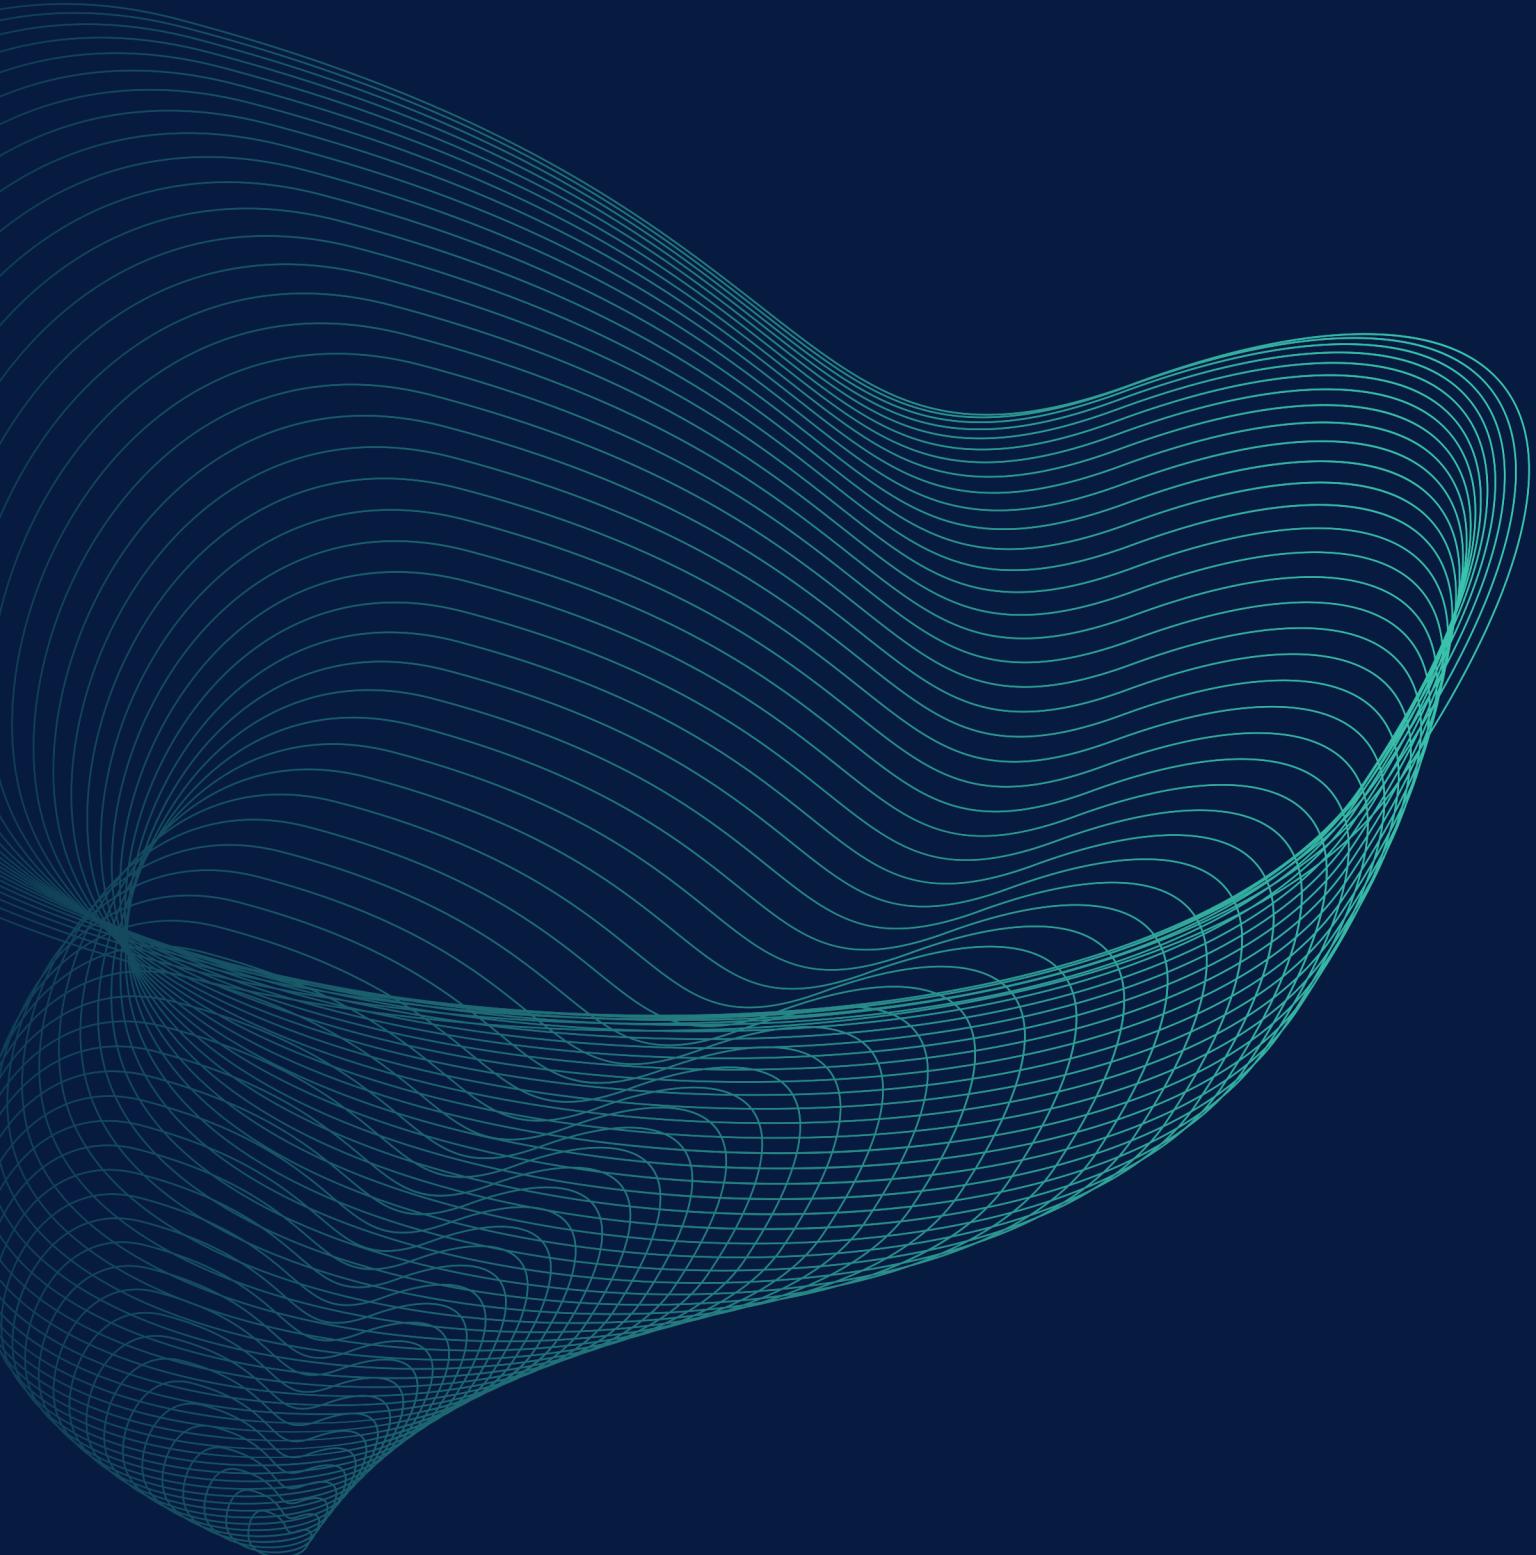

# AQI

What are the AQI values and air quality statuses for major countries?

- India
- China
- USA
- Russia
- South Africa
- Brazil
- Japan
- Germany
- France
- Great Britain
